TIGER MODULAR PERGOLAS

SHADE, SHELTER AND LIFE IN THE SUN

A place to eat, a sanctuary to relax, an area to entertain.
What could a pergola bring to your life?

Our aluminium Pergolas provide an elegant way to add living space to your home while making the most of the great outdoors.

Adjustable louvred roofs close to stop rain or give shade from the midday sun, while optional louvred walls and pull-down blinds increase weather protection and privacy.

And unlike a traditional wooden pergola there's no maintenance – reckon on a day to erect and years to enjoy.

Dining table, outdoor sofas, a hot tub or barbecue area. With Tiger Modular Pergolas, you can use them all year round.

“The beauty of our pergolas is their versatility. Roofs can be open to the sun, adjusted for shade or closed for shelter. And the addition of blinds or louvred walls means you can transform your pergola into a private, cosy space in the evening.”

Stuart Davison,
Director, Tiger Modular

MAKE IT YOUR OWN

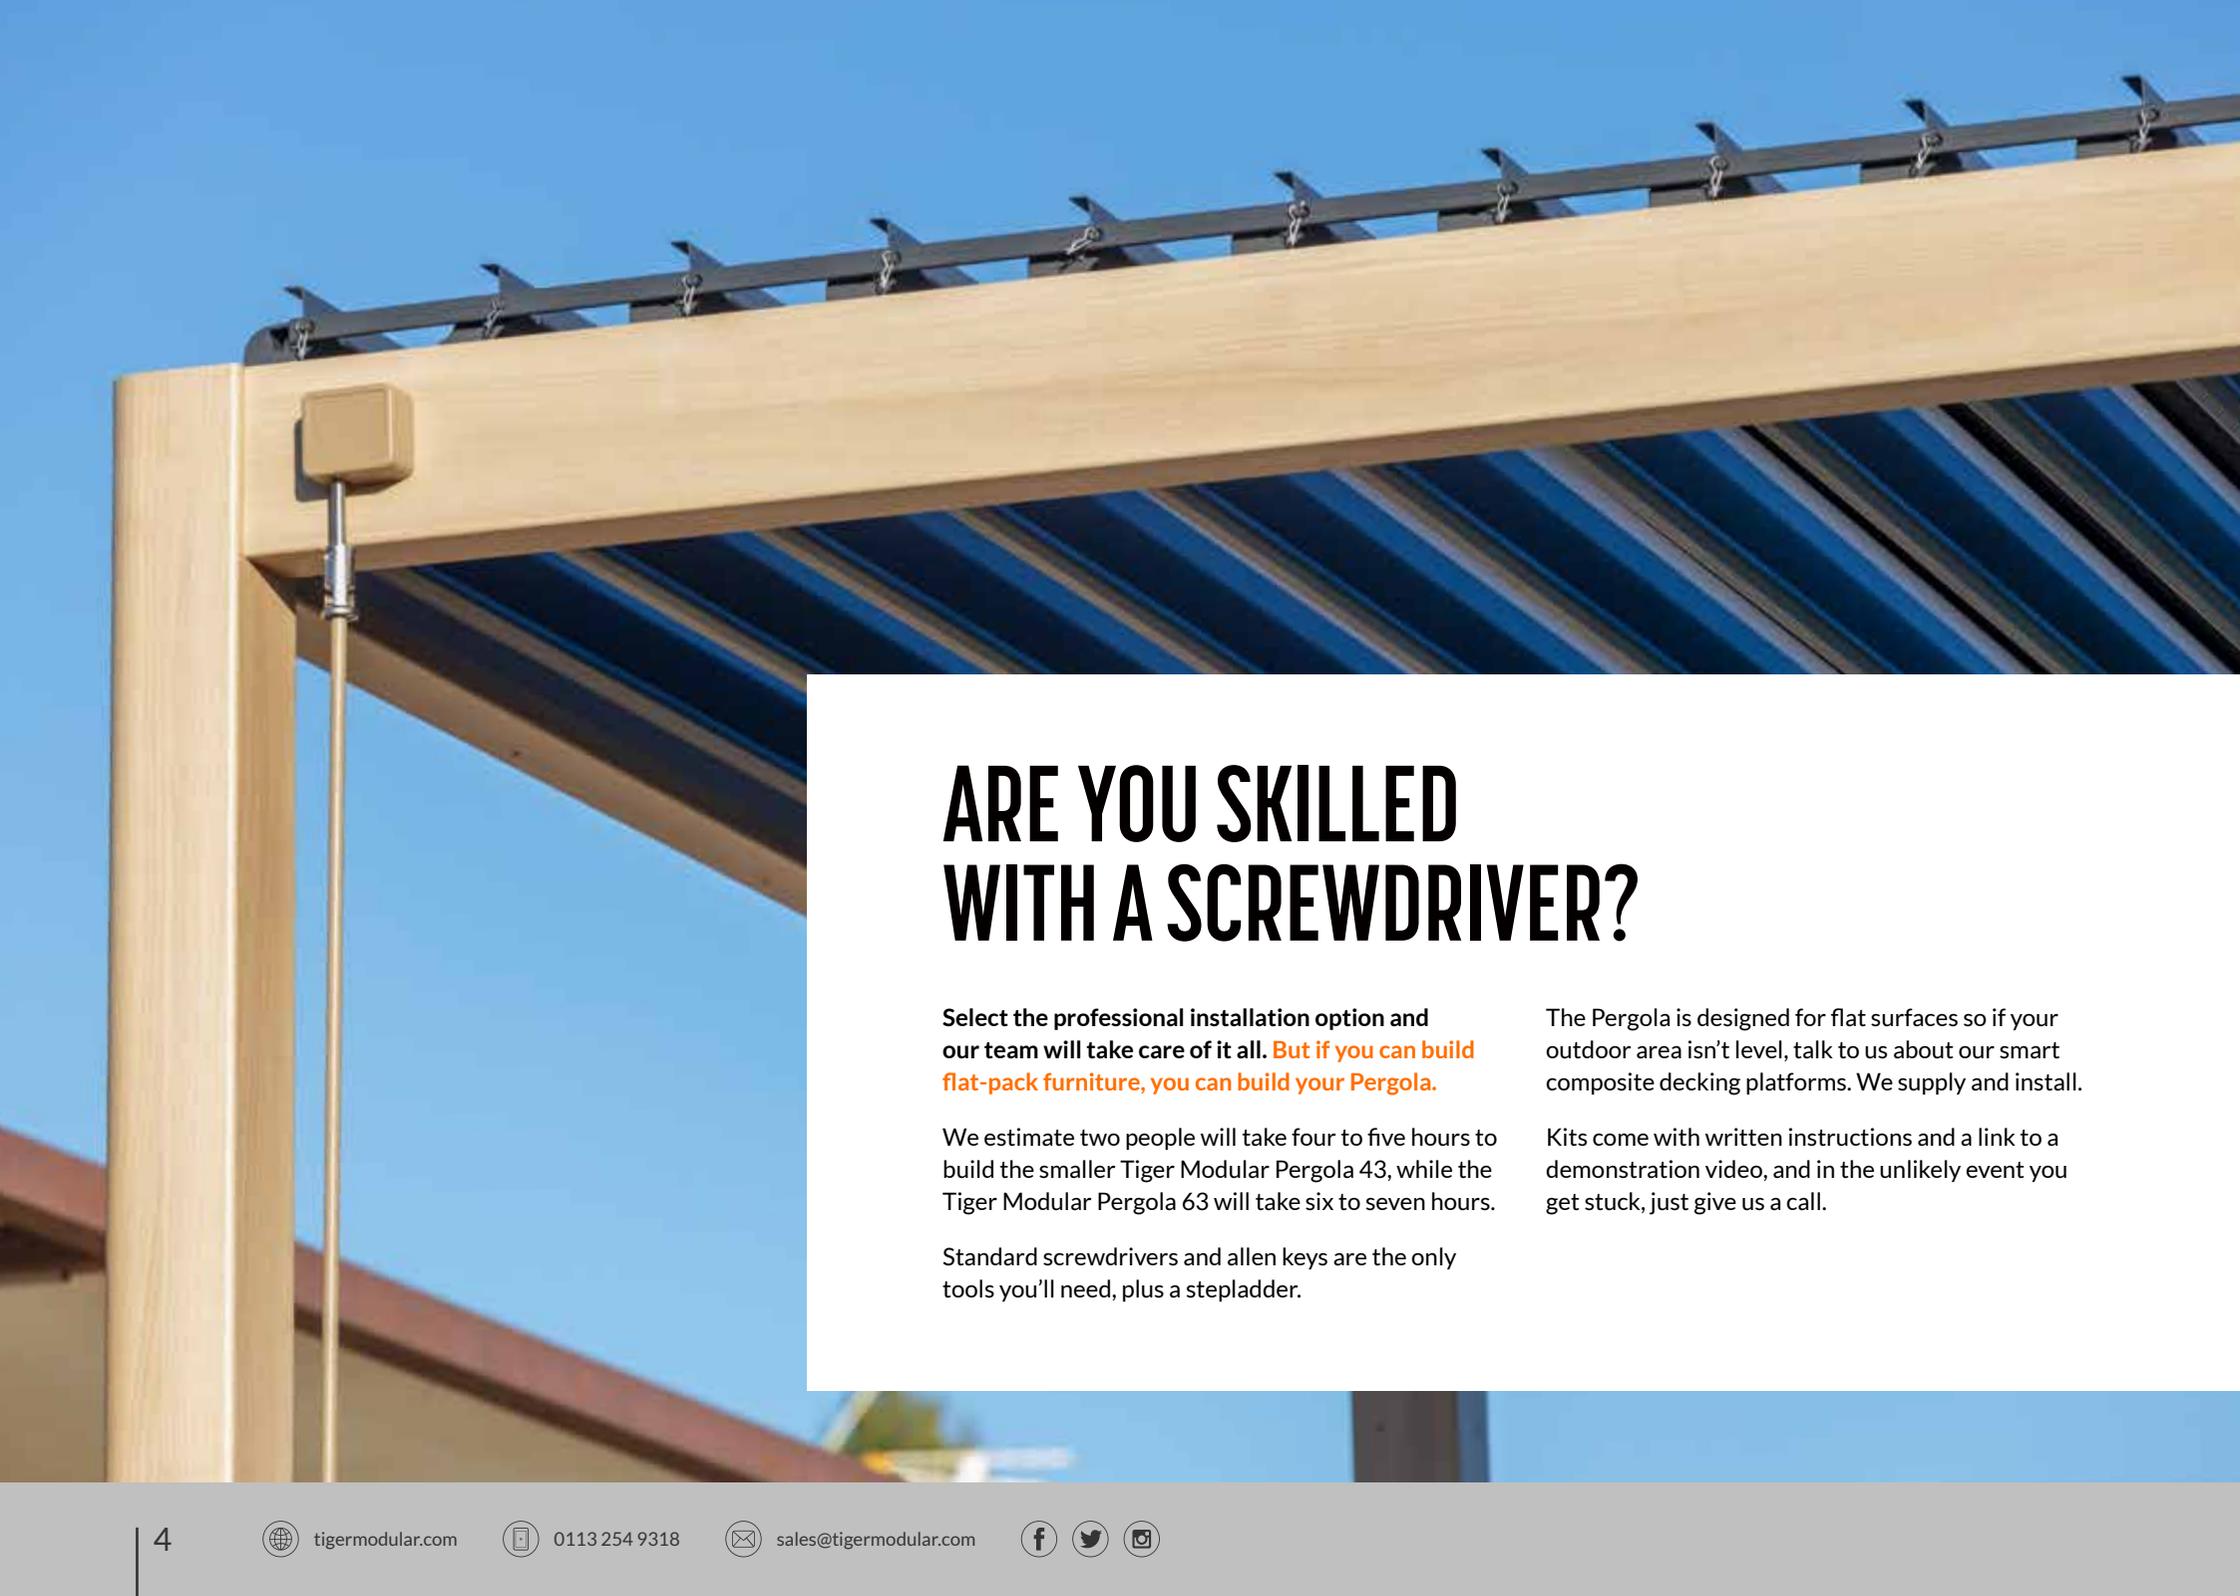

Outdoor spaces differ so Tiger Modular Pergolas can be customised to complement your environment.

First choose a size – we offer 4m x 3m or 6m x 3m, both standing 2.5m tall which means no need for planning permission in most cases.

Then consider adding fixed louvred walls and pull-down blinds to transform your pergola into a cosy, outdoor sanctuary. Or you could use them to protect against prevailing winds or to screen off an unwanted view.

Roof louvres are moveable using a rotating lever to open, close and adjust for shade. So, like the weather, a Pergola can change with the seasons

- Zero-maintenance powder-coated aluminium design
- Oak-effect frame with anthracite grey roof
- Tested to withstand 100kph winds and snow depth of 20cm with louvres shut
- Internal guttering brings rainwater down through the pergola legs and away via the outside edges of the feet
- Larger 6m x 3m pergola splits roof louvres into two sections for added versatility

ARE YOU SKILLED WITH A SCREWDRIVER?

Select the professional installation option and our team will take care of it all. **But if you can build flat-pack furniture, you can build your Pergola.**

We estimate two people will take four to five hours to build the smaller Tiger Modular Pergola 43, while the Tiger Modular Pergola 63 will take six to seven hours.

Standard screwdrivers and allen keys are the only tools you'll need, plus a stepladder.

The Pergola is designed for flat surfaces so if your outdoor area isn't level, talk to us about our smart composite decking platforms. We supply and install.

Kits come with written instructions and a link to a demonstration video, and in the unlikely event you get stuck, just give us a call.

FREQUENTLY ASKED QUESTIONS

How long will the Tiger Modular Pergola take to arrive?

If you choose to build the pergola yourself we'll confirm a delivery date shortly after you place your order. Expect it to arrive in seven to 10 working days, subject to stock. We'll need you to be at home for the delivery and have two people to safely offload the kit's boxes.

With our pro-installation service we work on a 10-20 working day delivery timeframe. Our team will need a day to build the pergola, or up to two days if we are fitting smart decking. We'll need you to recycle or dispose of the kit's packaging.

Can I install a pergola myself?

Yes, Tiger Modular Pergolas are straightforward to build. There needs to be two of you to get parts into position. Simple tools are enough – screwdrivers, allen keys and a tall ladder. We provide detailed printed instructions and a video guides online.

What maintenance does the Pergola need?

Very little. A wipe down with a cloth and soapy water will keep it clean. And to avoid damage in strong winds or snow, open the roof louvres and retract wall blinds.

How long do they take to assemble?

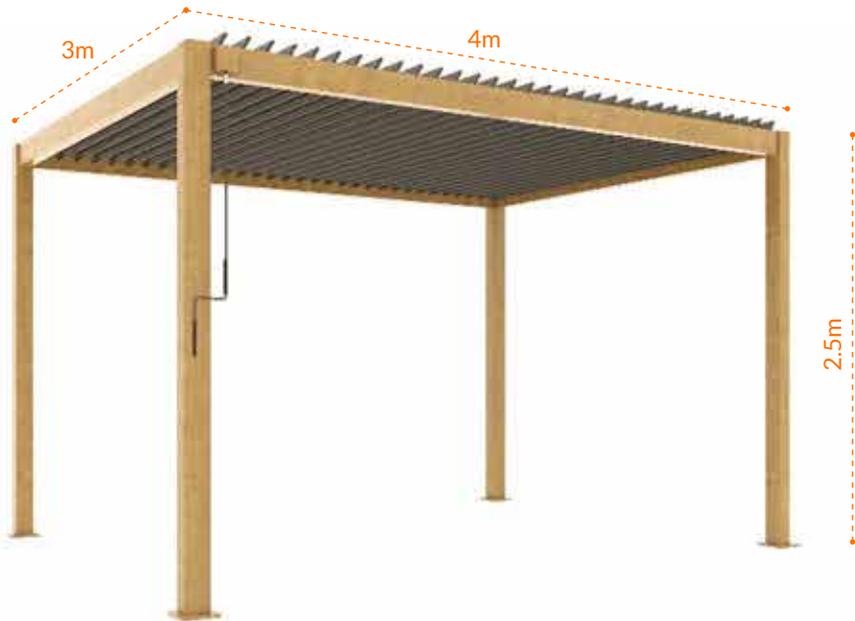

Typically it'll take the two of you four to five hours for the Tiger Modular Pergola 43, and six to seven hours for our Tiger Modular Pergola 63.

What if my outdoor space isn't flat?

We can supply and fit smart decking platforms to overcome issues with uneven ground. Call us to discuss your needs.
