

*Upgraded Kitchen

Dream barbecuing... with no kitchen nightmares!

The sounds and smells of your favourite food sizzling on the grill while you relax with family and friends – who doesn't love a barbecue?

Our bespoke Tiger Modular barbecue kitchens take outdoor cooking to the next level so you can enjoy food in the fresh air all year round.

A four-burner grill or Big Green Egg solid fuel barbecue, fridge to keep the drinks cold, worktops, lighting, storage, a sink... even a smart TV, sound system and a pizza oven, you can have it all.

Then when the party's over either wash up and put things away, or lock up and leave it till another day.

I love a barbecue but it can be more faff than fun when you're dragging your grill out of the shed and having to trail in and out of the house to prep food. Our barbecue kitchens solve that and bring luxury to your outdoor space.

Stuart Davison (Director)
Tiger Modular

- Three kitchen sizes with internal widths of 1994mm, 2526mm and 3094mm
- Specify an empty kitchen for your own kit, or choose from three fully fitted kitchens built around a Beef Eater 1600E four-burner barbecue or a Big Green Egg barbecue
- Top quality materials – our roofs have a 25-year guarantee
- Huge range of customisation options, from the colour and texture of the walls to extra appliances and features

Key facts

TIGER MODULAR PEQUENO

Prepared to perfection

It means 'small' in Spanish, but the Pequeno is big enough for our four-burner barbecue, a fridge, worktops and cabinets.

The narrowest of our fitted kitchens, it still has ample space for cooking and serving, while the addition of wall units with under-cabinet lighting mean you can keep crockery, glasses and utensils inside so it's all right there when you need it.

Like all our kitchens the Pequeno gets two barbecue options – gas or charcoal. For gas we specify the powerful Beef Eater 1600E four-burner grill with cast iron burners, stainless steel vaporisers to disperse flames, quartz one-start ignition and an elevated cooking rack. For charcoal it's the beautiful Big Green Egg (large) which can roast, spit roast, slow cook, bake and grill. Plus, it's endorsed by renowned Michelin-starred chef Tom Kerridge.

Once your Pequeno becomes the centre of your outdoor universe you'll appreciate that small is beautiful.

[MORE INFORMATION](#)

Internal width of 1994mm means it's perfect for smaller outdoor spaces

Specify either a canvas weather guard as standard, or upgrade to electric roller-shutter door or aluminium glazed bifold or French doors

Specify the deck, cladding, roof and trim colours and style

**Upgraded Kitchen*

TIGER MODULAR GAUCHO

Feed the posse...

A gaucho is a South American cowboy and you'll have space to serve the Magnificent Seven with our mid-sized barbecue kitchen.

The Gaucho builds on the Pequeno with a more generous width – enough to fit a sink for prepping food or washing up.

And there's more room for customisation – would a pizza oven please your gauchos, or a smart TV to watch the rodeo?

Internal width of 2526mm

Sink with cold water plus optional hot water unit

Door options are shared with the Pequeno with the added choice of a bi-fold door to make the most of the Gaucho's extra width

TIGER MODULAR CHURRASCO

*Upgraded Kitchen

Barbecue a banquet...

If you're thinking big, think Churrasco.

Named after the Brazilian word for a mixed grill, our widest kitchen gives you ample room to prepare and serve a feast - 1,252mm of the kitchen's internal width is worktop.

And the Churrasco has serious storage potential with base unit drawers and cupboard, plus three wall cabinets complete with downlighters if you need them.

Pimp it up with multimedia or a pizza oven and you might forget your house kitchen and never cook indoors again...

- Internal width of 3094mm
- Base units include three drawers and a cupboard
- Door options are shared with Pequeno

TIGER MODULAR ALFRESCO

*Upgraded Kitchen

Add your own ingredients

Are you a seasoned outdoor cook with a trusty burner you won't be parted with?

If so, our Alfresco kitchen could be all you need to make your outdoor-living dreams come true.

Using the shell of our Pequeno, Gaucho and Churrasco fitted kitchens you can design your outdoor kitchen exactly how you want it.

Or maybe you've got other ideas about how to use the Alfresco? Bar, sun trap, outdoor disco... it's up to you!

[BOOK A FREE CONSULTATION](#)

- Secure your building with either a canvas weather guard as standard, or upgrade to super-secure roller-shutter door, aluminium glazed bifold or French doors
- Pick from three sizes - internal widths of 1994mm, 2526mm and 3094mm
- Specify lighting or power as an optional extra

A BIT EXTRA

Consider personal taste

We've picked the materials for our barbecue kitchens so they can shrug off anything the British climate can throw at them.

You need to choose colours and finishes so they complement your outdoor space and home.

You'll have your say on roof and external wall colours and texture, internal walls, flooring colour, kitchen cabinet and worktop colours.

Also consider security. If your outdoor space is secure, a fashionable canvas blind may be your choice. If not, perhaps a roller-shutter door?

You can even order your kitchen in kit form if you fancy a DIY project.

Add sauce to the mix

Do you dream of a barbecue kitchen that's the perfect place for a party?

Add a smart TV and/or a sound system and you can really eat, drink and be merry while watching the big game or dancing to your favourite tunes.

Or specify a pizza oven and organise an Italian theme night...

Customisation

- Bluetooth sound system with integrated ceiling speakers
- Smart TV
- External double socket for power tools or appliances
- Pizza oven
- Sink hot water unit
- Larger decking area
- Kitchen wall units with under-cabinet lighting

Key facts

- Flooring – Smart composite decking in a choice of six wood grained finishes
- Internal walls in a composite finish with a choice of six colours
- Kitchen units in five colours, topped by ivory wave granite worktops or upgrade to steel grey

SELECT YOUR FINISH

Decking & cladding

Our composite cladding and decking is eco-friendly, long lasting and low maintenance. It is made using recycled plastic and wood fibres and is fire retardant. A durable polymer outer shell seals the composite board to provide an impermeable layer that resists scratching and fading.

If you want alternatives for cladding, we've got them, such as cedar, thermowood and painted steel panelling.

Kitchen cupboard doors

With crisp, contemporary lines, our kitchens have 19mm-thick doors with an integrated pull handle for a minimalist style.

We offer two distinct door finishes. A high-shine finish will brighten dark spaces or smaller areas, while the smooth, muted option provides a luxury feel.

Colour options range from light neutrals to a dark charcoal.

BATTLE OF THE BBQS

One's gas, one's charcoal and both are brilliant. But as you'll see, our barbecues are very different in character. Our gas burner is super-efficient and intuitive. Whereas cooking on our charcoal oven is an art – and your skills will develop over time.

WHICH ONE WILL YOU CHOOSE?

Beef Eater 1600E four-burner grill

- Super-fast quartz one-start ignition for instant heat – so no matches or endless clicking
- Powerful 4kW/hr cast-iron burners that can be turned up and down for fast heat regulation
- Double-layer rollback hood with glass viewing window and temperature gauge – so there's no need to lift the lid while cooking
- Stainless steel vaporisers ensure even heat distribution across the grill, and burn off meat juices to reduce flare-ups
- Elevated cooking rack provides a second cooking area with indirect heat, or for warming food
- Full-width hotplate drip tray ensures easy cleaning
- Seam welded burner box with enamel finish is super-durable for a long life. Two-year guarantee plus additional three years for the firebox

[REQUEST A QUOTE](#)

Big Green Egg (large)

- Ready to cook 12 minutes after lighting charcoal with a single firelighter. Hits 300C in 20 minutes
- Regulate heat with a regulator cap and draught door to increase/reduce oxygen. Practice makes perfect
- Hugely versatile. A range of accessories mean the Egg can be used to roast, slow cook, bake, grill, smoke, spit roast, be used for pan cooking, or 'dirty cooking' direct on the coals. EGGspander accessory increases cooking area with variable cooking heights
- Fuelled by 100% organic lumpwood charcoal which is toxin, accelerant and chemical-free. Egg sells a range of woods – hickory, eucalyptus and Canadian maple – to provide different flavours
- Single load of charcoal provides up to 24 hours of cooking time
- An empty Egg will 'carbon clean' itself in 20 minutes at 300C – like a self-cleaning oven. Ash is removed through the draught door
- Lifetime guarantee against defects

Find Your Perfect Space

At Tiger Modular we do what it says on the tin – we build modular buildings for gardens and commercial use.

We have perfected our processes creating home offices, personal gyms, spas, classrooms, retail spaces and nurseries at our state-of-the-art facilities, near Leeds. Pre-fabricating off site means we minimise disruption for our customers. And for many of our garden building projects we've completed the job – from laying foundations to hooking up electricity – in just a few days.

That means less noise, less mess and less stress.

Thanks to Stuart and the team for a really positive and quality experience and for a brilliant new space in a tricky location. Nothing was too much trouble and I found the price reflected the quality of the end product but really competitive with other similar companies. Their communication was fantastic and everyone was really professional.

The team at Tiger Modular did an outstanding job on our garden office. The entire process, from end-to-end, was brilliant, with A-star customer service. From the initial site visit with Tim through to the brilliant trades team, we had a great experience.

Great experience from start to finish. Remarkably affordable, modern company who built our office/gym without any fuss hassle or complaint within 6 weeks of first meeting. Will be using again in the future should we move!
